

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): An organic electroluminescent device ~~comprising; at least comprising:~~ an anode, an organic emitting layer and a cathode, stacked in this order; and

~~at least~~ a first emitting layer comprising a fluorescent dopant and a second emitting layer comprising a phosphorescent dopant, said first emitting layer and said second emitting layer being stacked in the organic emitting layer;

wherein

the first emitting layer is in contact with the second emitting layer; and
the organic electroluminescent device emits white light.

Claim 2 (Original): The organic electroluminescence device according to claim 1, wherein the first emitting layer is closer to the anode than the second emitting layer.

Claim 3 (Original): The organic electroluminescent device according to claim 1, wherein the first emitting layer is closer to the cathode than the second emitting layer.

Claim 4 (Original): The organic electroluminescent device according to claim 1, wherein a host of the first emitting layer comprises an electron transporting compound or hole transporting compound, and a host of the second emitting layer comprises an electron transporting compound or hole transporting compound.

Claim 5 (Original): The organic electroluminescent device according to claim 4, wherein the electron mobility of the electron transporting compound is $10^{-5} \text{ cm}^2/\text{V}\cdot\text{s}$ or more.

Claim 6 (Original): The organic electroluminescent device according to claim 4, wherein the hole mobility of the hole transporting compound is $10^{-4} \text{ cm}^2/\text{V}\cdot\text{s}$ or more.

Claim 7 (Currently Amended): The organic electroluminescent device according to ~~any one of claims 1 to 6~~ claim 1, wherein the first emitting layer emits blue light, or yellow-to-orange or red light.

Claim 8 (Currently Amended): The organic electroluminescent device according to ~~any one of claims 1 to 6~~ claim 1, wherein the second emitting layer emits blue light, or yellow-to-orange or red light.

Claim 9 (Canceled).

Claim 10 (Currently Amended): A display comprising the organic electroluminescent device according to ~~any one of claims 1 to 6~~ claim 1.
